Congratulations to

Nurcin Celik

Honored with a Presidential Early Career Award for Scientists and Engineers (PECASE)

UNIVERSITY OF MIAMI
COLLEGE of ENGINEERING
The University of Miami College of Engineering is proud to announce that Nurcin Celik, associate professor in the Department of Industrial Engineering, has been honored by President Obama with a Presidential Early Career Award for Scientists and Engineers (PECASE). The award is the highest honor the nation bestows on a scientist or engineer at the beginning of his or her career.

This honor recognizes Celik’s innovative research and community service at the frontiers of science and technology. Celik is the first recipient of this award at the University of Miami. The award is presented for her pioneering contributions for efficient and robust operation of energy infrastructures, through theoretical and methodological foundations of dynamic data-driven adaptive simulations for real-time control and decision-making in large-scale and complex systems, and for her leadership in networking the research community and mentoring graduate and undergraduate students as well as students from underserved communities.
