UNIVERSITY OF MIAMI COLLEGE of ENGINEERING

EDUCATION OUTREACH PROGRAMS IN ENGINEERING AND TECHNOLOGY

Introduction to Blockchain & Bitcoin

Lead Presenter: Dr. Germán Creamer

This day long course will introduce the basic concepts of blockchain and digital signatures and their applications to cryptocurrencies. It will review the rules and structures of bitcoin as a cryptocurrency and as a financial asset that could be part of an investment portfolio. Participants will include several leaders from the industry and include discussions with leaders in the bitcoin industry. Registration is limited, and on a first come first served basis. **Please complete registration below:**

"The University of Miami and the College of Engineering are helping to usher in the next wave of innovation here in Miami. Their course offering on cryptocurrency and its implications and applications will prove invaluable for all those in the Miami tech community and members of the public and private sector who want to be a part of Miami's future. I am thrilled to support this work."

> –Francis X. Suarez, Mayor of Miami

Germán Creamer is an Associate Professor of quantitative finance and business analytics at Stevens Institute of Technology. Dr. Creamer has been a visiting scholar at Stern School of Business, NYU, and a senior manager at American Express. He has taught at Columbia University, Tulane University, Central University of Finance and

Economics, UIBE, and several Latin American business schools. Dr. Creamer has been an economic advisor to the President and banks of Ecuador and the government of Equatorial Guinea, and program officer for the UN Development Programme. He has also consulted for several hedge funds and international organizations. Dr. Creamer has a Ph.D. in Computer Science (specialized in computational finance), an MSc in Financial Engineering, both from Columbia University and a Ph.D. in Economics from the University of Notre Dame. He earned the Chartered Financial Analyst charter in 2002.
